Of course a good many of these "rabbits" were merely decoys, placed in the grass at appropriate places to jump up and run and start the real rabbits. In other words, the Curtis people had scattered their friends around among the various candidates to wait until the nsychological moment and then flop psychological moment and then flop into the Curtis puddle with a loud

The Final Ballot, The Final Ballot.

It was Sig Lehman, of Labette, the new representative in the house, that gave Curtis the vote which elected him though that distinction was loudly claimed by Senator Fitzpatrick.

Curtis had 50 votes when the last name on the list was called. Six more were necessary. Just, at this time, Campbell cut the rope which held his rapidly disintegrating forces, and the stampede was started by Senator E. F. Porter who rose and changed his vote from Campbell to Curtis.

Then the Curtis people cheered for Leland for several seconds. It was Le-land's "flop" that broke the backbone of the Curtis opposition. The enemies of Curtis had counted on Leland as a friend. They had even talked of mak-ing him speaker of the house. When it came to the test, Leland hid himself in the Getty vote for three ballots, and then made his sensational handspring

into the Curtis camp. The following is the "rabbit list," showing where the "flops" came from that nominated Curtis as United States

C. I. Kerr, who was service inspector, reporting to General Manager D.
E. Cain, before he went to the Denver & Rio Grande, has been appointed to the position of trainmaster of the Rock Island at Topeka with jurisdiction over what is known to the Rock Island employes as subdivisions 13 and 17 and the Kansas City line, being the territory in the Kansas division.

D. Coughlin, has been assigned to the work of superintending the establishment of the block system on the Rock Island lines between Topeka and Herington. As fast as the arrange-

Herington. As fast as the arrange-ments are perfected. Mr. Couglin will instruct the agents and operators in the methods of handling the business under the block system.

The Rock Island management has decided to extend the block system of train dispatching over all the impor-tant lines of the road that are not already so equipped. The northern line from Chicago to Denver, being the line through Iowa and Nebraska has already adopted the use of this plan, the safest known to callway men for handling trains. As soon as the work of installing this system between To-peka and Herington is completed, the work will be extended eastward till the line to Chicago is completed as far as Davenport, from which point the Rock Island has a double track to Chicago.

Island has a double track to Chicago.
Mr. Coughlin will have charge of the
work of instructing the operators on his
division also.

The decision of the Rock Island to install the block system on these lines
necessitates the employment of many
additional telegraph operators. It becomes necessary to employ both day and
night operators at every station, for
the reason that the distance between
each station constitutes a block and the reason that the distance between each station constitutes a block, and every operator at every station both day and night keeps a train sheet on which they keep tab of the trains in the blocks adjacent to them in each

direction.

Following the installation of this system on the lines east to Chicago, work will be carried out installing the system south from Herington on the line extending into Texas.

Mr. McKernan, who leaves Topeka to become superintendent with head-quarters at Fort Worth, has served in railway work successively as engineer, conductor, yardmaster, trainmaster. and superintendent of terminals,, and now becomes division superintendent. He is regarded as one of the best of the operating men on the southwestern of the Rock Island.

C. I. Kerr, is another exceptionally clever railway man. He is young yet, being but 35 years of age, but he has worked his way up unaided by any other means than his own merit.

Mr. Kerr began his railway career as a measurager boy for the telegraph

as a messenger boy for the telegraph department and the agent of the Santa Fe railroad at Caldwell. At odd mo-ments he learned telegraphy. He soon became an operator and was appointbecame an operator and was appointed to an operator's position. He was promoted to be a station agent, and held positions of this character at many points on the Santa Fe lines, the last place at which he was agent being at El Paso. In 1901 he was called from El Paso to enter the office of J. E. Hurley, who was at that time gen-eral superintendent of the Santa Fe at La Junia, as transportation clerk When Mr. D. E. Cain succeeded Mr. was appointed chief clerk, a position he held till 1905 when he was elevated to the position of trainmaster of the Rio Grande division. He remained in that capacity with the Santa Fe till Mr. Cain went to the Rock Island as general manager, following Mr. Cain in the fall of 1905 to become his chief clerk. On July 1 1908 Mr. Kerr was clerk. On July 1, 1906, Mr. Kerr was appointed service inspector reporting to the general manager's office.

Effective at once he has been appointed trainmaster of the lines under the jurisdiction of the superintendent of the Kannas division.

Mr. D. Coughlin, who takes charge of the construction work incident to the installation of the block system, began his railway career on a small Illinois railroad in 1886. This road was absorbed by the Santa Fe and Mr. Coughlin has served that company in the capacity of agent at various stations, operator, dispatcher, chief dispatcher and trainmaster at various points, joining forces with the Rock Island in 1906.

Franklin Bogue, who was chief clerk to D. E. Cain before he resigned as gen-eral manager to go to the Denver & Rio Grande, has been appointed transporta-tion clerk in the office of General Super-intendent W. S. Tinsman at Topeka.

General Augustus Greely, now in com-mand of the Northern division and the department of the Missouri, would ar-rive here Sunday night at 6:45 o'clock mand of the Northern division and reddepartment of the Missouri, would arrive here Sunday night at 6:45 o'clock to make an inspection of the command.
